SKILLS

- HTML
 - React
 - CSS
 - Node.js
 - PostgreSQL
 - Express
 - JavaScript
 - Python
 - Java
 - C
 - C++
 - Git
 - GitHub
 - Docker
 - Linux
 - REST APIs
 - Cybersecurity
 - Embedded Systems
-

PROJECTS

ECOLOOP

Rwanda Coding Academy

FEBRUARY 2026

Engineered an AI and IoT ecosystem for intelligent e-waste management, combining computer vision, safety Monitoring, and real-time valuation to support sustainable recycling and circular economy initiatives.

NEXRA

Rwanda Coding Academy

NOVEMBER 2025

Engineered a scalable e-commerce platform featuring product management, secure authentication, order processing, And responsive user experiences for buyers and sellers.

LYFE

Rwanda Coding Academy

JUNE 2026

Developed an AI-powered healthcare web application that integrates wearable health data and pantry inventory to Deliver personalized nutrition guidance, improve accessibility, and reduce food waste.

CODEFOLIO

Rwanda Coding Academy

FEBRUARY 2026

Built a full-stack platform for project portfolio management and verification, enabling developers to showcase authenticated Project, manage submissions, and enhance professional credibility.

CERTIFICATES & ACHIEVEMENTS

- Tech for Everyone -Yeva Hyusyan, 2025
- Journée Culturelle de la Francophonie, 2023
- TryHackMe Advent of Cyber 2025
- Gemini Academy-Google for Education 2025
- Vice President of the Environment Initiative
- iLead Alumni
- AI Ideathon 3rd Place
- Active Participant in PrimeCTF and won in Women in Cybersecurity
- 2nd Place at STEMist Hacks IV Hackathon AI Track
